Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 March 2005.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.

DETAILED ACTION

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 9/13/2002. It is noted, however, that applicant has not filed a certified copy of the 2002-267734 application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 3 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Neither the specification nor the drawings depict or explain an "order replacement request" or an "order replacement unit". For the purpose of the office action the terms will be considered a typographical error and the terms will be replaced with "order placement request" or an "order placement unit" respectively.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In this case the examiner is unable to determine if the apparatus is hardware or software and is only software than the claims would not have utility since the apparatus is software per se.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3625

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5,7-18,20-26 are rejected under 35 U.S.C. 102(e) as being anticipated by DE LA MOTTE et al (US PG PUB 20030014318).

In regards to claims 1-5,7-18,20-26, DE LA MOTTE teaches all the features of the instant claims. For instance, DE LA MOTTE discloses means for transmitting and receiving quotations under predetermined rules (FIG 1, transaction facilitator and para 0052) and store previous prices from quotations (para 0034).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE LA MOTTE in view of Official Notice.

In regards to claims 6 and 19, DE LA MOTTE teaches returning an accepted order from a buyer to a supplier and using rules to determine what will be the result of

the order acceptance (para 0048), but does not specifically teach that the supplier is providing an order acceptance to the buyer. The examiner takes official notice that providing order confirmation to a buyer was old and well in the art at the time of the invention. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in DE LA MOTTE sending a confirmation to the buyer, because this signals to the buyer that the sale has been consummated and that further RFQ efforts are unnecessary thus giving the buyer piece of mind.

Further, it is noted that all of the elements of the cited references perform the same function when combined as they do in the prior art. Thus such a combination would have yielded predictable results (see Sakraida, 425 US at 282, 189 USPQ at 453. Since the independent claims only unite old elements with no change in there respective functions the claimed subject matter would have been obvious under KSR, 127 S. Ct at 1741, 82 USPQ2d at 1396.

Supreme Court Decision in *KSR International Co. v. Teleflex Inc.* (KSR, 82 USPQ2d at 1396) forecloses the argument that a specific teaching, suggestion, or motivation is required to support a finding of obviousness. See the recent Board decision *Ex arte Smith*, --USPQ2d--, slip op. at 20, (Bd. Pat. App. & Interf. June 25, 2007).
